

AK 4062
LIGHT DUST DEPOSIT

The perfect product to recreate accumulated dust and dirt on your model. This Light Dust enamel paint is perfect suitable to create dust on vehicles in any theatre.

Use this product to recreate accumulated dust on your model.

Shake before use and apply the products directly from the jar.

Use a flat brush moist with White Spirit and blend in the paint proximaly 10 minutes after it is applied.

Due to the very fine texture of the paint the result is a perfect simulation of built up dust or dirt.

Paint on the product directly from the jar.

Blend in the enamel paint after it has dried for about 10-15 minutes.

After is has completely dried you create a nice built up dust effect due to the fine texture in the paint. Repeat if you want more stronger effects.

When you blend in the Dust & Dirt Deposits make sure the major part of the paint must remain in and around details for a realistic result.
